

平成 28 年度 研究成果報告書
Research Achievement Report FY2016

講座名・職名 Course Title・Job Title	アジア I ・特任講師
氏名 Name	趙 瑜美
専門分野 Academic Field	Linguistics

主たる研究テーマ Principal Research Subject	The Semantic Types of Pluractionality: External Pluractionals in Korean
<p>Comparing to verbal complexes with the auxiliary verb <i>tayta</i> ‘attach’, verbal complexes with the auxiliary verb <i>ssahta</i> ‘cumulate’ have a relatively naïve restriction on semantic distributions. For example, some change-of-location events which are not applicable in <i>tayta</i>-verbal complex appear as <i>ssahta</i>-verbal complexes. Even where other change-of-locations which are possible to appear both with <i>tayta</i> and with <i>ssahta</i>; however, <i>ssahta</i>-verbal complex does not show any constraint on plurality on theme while <i>tayta</i> does. This study considers some semantic behaviors of <i>ssahta</i> as one of characteristics which external pluractional markers commonly show.</p> <p>発表 (Non-)Stative Pluractionality of Predicate Reduplication, 《韓国言語学会 2016 年冬大会》〈言語データ処理の理論と実際〉, December 10th 2016, Anyang University, Anyang, Republic of Korea.</p>
