平成 30 年度 研究計画（ホームページで公開） Research Plan FY2018 (Post on Website)

主たる研究テーマ Principal Research Subject	The Study of the Morphologic Property in the Tri-syllabic Repetition Words based on Korean				
研究計画（400 字～500 字で記入すること。） Research Plan (Approximately 100 Words)					
<p>The purpose of this study is to figure out the morphologic property of tri-syllabic repetition words in onomatopoeia. First, we have to check the existence of phonological homologous and repeated items in the words to distinguish tri-syllabic repetition words from others. I compared the syllabic patterns of the end syllables in tri-syllabic repetition words with those in dual-syllabic repetition words and found that the tri-syllabic repetition words have more systematic syllabic patterns. The research for the pattern of phonological alternation in tri-syllabic repetition words also shows that the tri-syllabic repetition words have more diverse changes than the dual-syllabic repetition words due to their syllabic length. Most of the tri-syllabic repetition words could be abbreviated into the dual-syllabic repetition words, and there are many of patterns of abbreviation. Finally, I compared the patterns of derivatives for the tri-syllabic repetition words with those for dual-syllabic repetition words as I noticed that there are many derivatives in onomatopoeia.</p>
