平成 27 年度 研究計画 Research Plan FY2015

主たる研究テーマ Principal Research Subject	Contrastive study of English phrasal verbs and Japanese compound verbs				
研究計画 Research Plan	<p>I am currently working on completing my Ph.D. dissertation, which offers a cross-linguistic comparison of the patterns of semantic extension observed for two types of grammatical constructions in Japanese and English. More specifically, I focus on the different meanings expressed by English phrasal verbs with <i>out</i> and identify where the polysemous network of <i>out</i> and that of Japanese compound verbs involving <i>deru/dasu</i> overlap, intersect and diverge. It is the goal of this study to identify and characterize non-correspondence ‘zones’ in terms of the construal operations that drive their occurrence. Moreover, it suggests that <i>viewpoint</i> plays a crucial in the implementation of such construal operations.</p>				
共同研究可能な分野 Research Fields feasible for joint research	Japanese linguistics	English linguistics	Linguistics	Japanese language education	Foreign language education
キーワード Keywords	semantics	句動詞	複合動詞	polysemy	viewpoint
