主たる研究テーマ Principal Research Subject	Peruvian Spanish / Teaching methods				
研究計画 Research Plan	<p>I plan to research on the use of <estar que + verb in present tense> in Peru. This construction exists in peninsular Spanish but the meaning it conveys is different to that of Peruvian Spanish. A study on this construction has already been conducted in Peru and concludes that this construction is used instead of <estar + gerund>. I consider that the selection of either <estar que + verb in present tense> or <estar + gerund> depends on the situation and the meaning that the speaker wants to transmit and will try to confirm this through questionnaires and corpus-based investigation.</p> <p>I will also continue my research on the employment of Spanish determiners and will also continue developing teaching material.</p>
